Parts Manual

DJA Engine Diesel

GENERAL INFORMATION

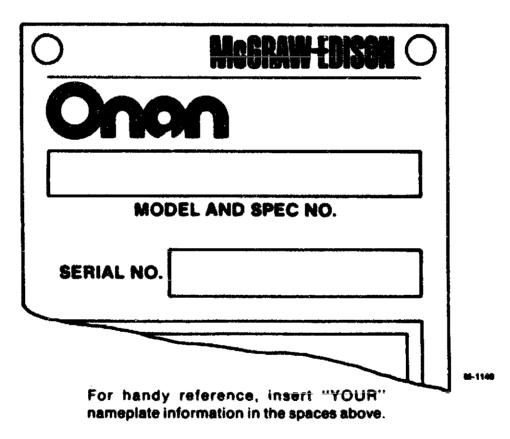

INSTRUCTIONS FOR ORDERING REPAIR PARTS

For parts or service, contact the dealer from whom you purchased this equipment or refer to your Nearest Authorized Onan Parts and Service Center.

To avoid errors or delay in filling your parts order, please furnish all information requested.

Always refer to the nameplate on your unit.

1. Always give the MODEL, SPEC NO. and SERIAL NO.

- 2. Do not order by reference number; always use part number and description.
- 3. Give the part number, description and quantity needed of each item. If an older part cannot be identified, return the part prepaid to your dealer or nearest Onan Parts and Service Center. Print your name and address plainly on the package. Write a letter to the same address stating the reason for returning the part.
- 4. State definite shipping instructions. Any claim for loss or damage to your unit in transit should be filed promptly against the transportation company making the delivery. Shipments are complete unless the packing list indicates items are back ordered.

Prices are purposely omitted from this Parts Manual due to the confusion resulting from fluctuating costs, import duties, sales taxes, exchange rates, etc.

For current parts prices, consult your Onan Dealer, Distributor or Parts and Service Center.

"En esta lista de partes los precios se omiten de proposito, ya que bastante confusion resulto de fluctuaciones de los precios, derechos aduanales, impuestos de venta, cambios extrajeros, etc."

Consiga los precios vigentes de su distribuidor de productos "ONAN."

967-0413 (5-79) DJA ENGINE PARTS CATALOG

INTRODUCTION

This catalog applies to the standard DJA Engines (Formerly called DJ30). Parts are arranged in groups of rotated items. Each illustrated part is identified by a reference number corresponding to the same reference number below the illustration. Parts illustrations are typical. Unless otherwise mentioned in the description, parts are interchangeable between models. Right and left engine sides are determined by facing the blower end (front) of engine.

MODEL NO. AND SPECIFICATION

DJA-MS/* = Standard Units Without Clutch

DJA-MF/* = Standard Units With Clutch

* - The Specification Letter advances (A to B, B to C, etc.) with manufacturing changes. The Specification Number identifies optional equipment on special models.

OPTIONAL EQUIPMENT PARTS SECTION

This section contains illustrated parts listing of factory installed options for these industric Engines. Options may not be applicable to all models; for field conversions additional parts at usually required. Optional parts listed in this section are in addition or in place of those show in the standard engine parts section.

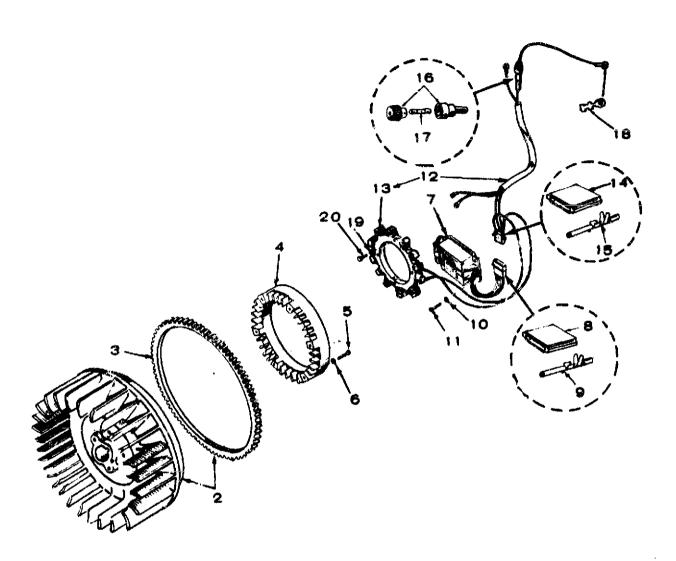

OPTIONAL HIGH TEMPERATURE SWITCH
