

PARTS CATALOG

3.5 EGH

Generating Set - 50 HZ.

Introduction

This manual applies to the Portable Generator Sets as listed in the Generator Set Data Table. Parts are arranged in groups of related items and each illustrated part is identified by a reference number corresponding to the same reference number in the parts list. Parts illustrations are typical. Using the model and specification number from your generator set nameplate, select parts that apply to your set. Right and left sides are determined by facing the engine end (front) of the set.

Generator Set Data Table

MODEL AND SPECIFICATION	WATTS	RPM	VOLTS	HERTZ	WIRE	PHASE	STARTING
3.5 EGH-AM**/*	3500	3000	110/220	50	4	1	Recoil
3.5 EGH-EM**/*	3500	3000	110/220	50	4	1	Electric

* - The diagonal line (/) in the model and specification number separates generator set characteristics from the specification number and letter. The specification number denotes customer requested options or deviations from a standard model. The specification letter advances (A to B, B to C, etc.) with major manufacturing changes.

** - Letters are now used in the model to indicate the voltage code and replace the corresponding number and letter. (Example: 2.8 KV-FA/ was formerly 2.8 KV-1R/) This change occurred during the later portion of Spec A.

Abbreviations

NFS - NOT FOR SALE
AVR - AUTOMATIC VOLTAGE REGULATOR
